Microsoft MSP Partners
Services Program from CoreView

A unified solution to manage your customers hybrid environments
(Office 365 and On-Premises)

Streamline your Office 365 managed services by reducing your admin staff requirements through task automation and customizable workflow. CoreView provides an advanced management, white-label solution for Office 365 to help MSP's drive admin efficiencies and maintain complete oversight for their customers hybrid environments. Only CoreView provides an all-in-one solution that incorporates Monitoring, Management, Security Auditing, Administration, Reporting and Training / Adoption to empower partners with advanced management services for their customers on-premises and cloud environments.

CoreView is a Microsoft Azure hosted application which serves as a proxy to Office 365, replacing the native Admin Portal. Sitting between the MSP administrator and Office 365, CoreView leverages Azure AD single sign-on to securely control access to its product functions. Partners can leverage the RBAC capabilities in CoreView to delegate tasks to customer helpdesk or on-site IT admin personnel as needed.

Streamline admin tasks with customizable workflow

Complex admin tasks can be performed automatically through the customizable workflow processes provided by CoreView. These menu-driven functions enable MSP administrators to finish their day-to-day tasks in minutes instead of hours and greatly reduce the possibility of human errors due to repetitive tasks.

All-in-One management solution to help MSP's optimize management for customer hybrid environments

Monitoring & Reporting

Security Auditing

Administration & Provisioning

Training & Adoption

Possible Add-on Services

License Management Optimization
Configure license pools with hard quotas assigned to specific business unites, and then implement monthly chargeback accounting and reporting.

Partner branded training and adoption
Partners can rebrand our solution to drive usage adoption for Office 365 through targeted marketing campaigns with access to on-line training videos covering all aspects of O365, Windows 10 and ProPlus. CoreView provides over 2,200 "how-to" videos online.

Security compliance auditing services
Simplify the monitoring, reporting and alerts for security compliance issues to improve overall security best practices. Configure a security compliance dashboard that covers all documented security policies for your customer.

During calls, ask your customers:
What challenges are you facing with O365 management OR controlling license costs?

Explain how you train your users for new technologies like Microsoft TEAMS?

How do you perform security compliance monitoring and auditing?

Do you have automated alert notifications for security compliance issues?
