

Microsoft Partners Reseller Program from CoreView

A unified solution to manage hybrid environments (Office 365 and On-Premises)

Introduce your customers to a SaaS solution that will help them maintain complete visibility and control over their Office 365 environment. CoreView provides an advanced management solution for Office 365 to help organizations drive admin efficiencies and maintain complete oversight for their hybrid environments. Only CoreView provides an all-in-one solution that incorporates Monitoring, Management, Security Auditing, Administration, Reporting and Training / Adoption to help companies streamline support of both their on-premises and cloud environments.

CoreView is a Microsoft Azure SaaS application which serves as a proxy to Office 365, replacing the native Admin Portal. Sitting between the administrator and Office 365, CoreView leverages Azure AD single sign-on to securely control access to its product functions.

Empower administrators with customizable workflow

Complex admin tasks can be performed automatically through the customizable workflow processes provided by CoreView. These menu-driven functions enable administrators to finish their day-to-day tasks in minutes instead of hours and greatly reduce the possibility of human errors due to repetitive tasks.

All-in-One management solution to help customers stay in control of their hybrid environments

Details for Partners

Reseller discounts

Earn 25% discount at deal registration, or 5% discount to transact for non-registered deals.

Solution comparison to MS Admin Center

Provides complete visibility to ALL aspects of Office 365 user activity and service availability. Enables license management and security auditing. [Comparison Overview](#).

Training Videos for Office 365

The CoreView solution includes access to over 2,200 task-based “how-to” training videos that cover all aspects of Office 365 and Microsoft Professional Plus. [Datasheet for Training and Adoption](#).

Security compliance auditing

Simplify the monitoring, reporting, auditing and alerts for security compliance issues to improve overall security best practices. [Recorded Webinar Link](#).

During calls, ask your customers:

What challenges are you facing with O365 management OR controlling license costs?

Explain how you train your users for new technologies like Microsoft TEAMS?

How do you perform security compliance monitoring and auditing?

Do you have automated alert notifications for security compliance issues?
